

# Together we shape your future.

EDS-Casting & Forging is on the  
lookout for new project engineers

Yes, our Amsterdam office is hiring.

Are you educated and experienced in design engineering? Do you have your own inventive way of solving design problems and do you want to know everything about manufacturing processes? Then you will fit our team of remarkable design engineers well. All that we expect in return is 40 hours per week of your time, and your best ideas to even further impress our clients.

We offer you the job of project engineer in which you will work within our engineering team to design predominantly metal castings and forgings. During our development process you get experienced in every design phase, from analysis and conceptual design to final supply. You will see molten metal, big hydraulic rams for forging and components from as small as your pinky to as large as houses.

Interested? Send your personal application letter, portfolio and resumé to Enzio Lette at [enzio@edsinnovation.com](mailto:enzio@edsinnovation.com)
